Simon Joseph K

Technical Support Engineer

Bengaluru, Karnataka | +91 8618709741 | simonjoseph.sk@gmail.com

PROFESSIONAL SUMMARY

Technical Support Engineer with close to two years of experience supporting enterprise clients at IBM and Kyndryl. I work incidents and service requests in ServiceNow, sort out user access and device problems across Okta, Azure and Intune, and keep tickets inside SLA. I'm comfortable talking to clients directly, tracing a problem back to its cause, and writing it up so it doesn't come back. BCA graduate who also uses SQL, Excel and Power BI for ticket and SLA reporting.

TECHNICAL SKILLS

- **Ticketing and ITSM:** ServiceNow (incident, request, knowledge), SLA monitoring, escalation, root cause analysis
- **Identity and access:** Okta (SSO, MFA, password resets, user and group setup), Azure AD / Entra ID, license and group management
- **Endpoint and cloud:** Microsoft Intune (device enrollment, compliance, app deployment), Microsoft Azure, Windows 10/11, Microsoft 365
- **Client support:** L1/L2 troubleshooting, remote support over calls and email, client communication, ticket documentation, knowledge base writing
- **Reporting and scripting:** Excel (Pivot Tables, XLOOKUP, Power Query), Power BI, SQL (basics), Python (basics)
- **Other tools:** SAP S/4HANA, MS Office, AutoCAD

PROFESSIONAL EXPERIENCE

Senior Customer Service Associate | Kyndryl | 06/2026 - Present

- Handle client queries and service requests in ServiceNow, and close them within SLA targets.
- Fix login, MFA and SSO problems in Okta and Azure, and app or device issues on Intune-managed laptops. Escalate to L2/L3 with clear notes when the fix is beyond L1.
- Log each incident with what was tried and how it was resolved, so nobody has to ask the client the same thing twice.
- Make ticket and SLA reports in Excel and Power BI, and use SQL and Python (basics) to cut down repeat manual work.

Technical Support Engineer (IBM Client Account) | IBM | 02/2025 - 05/2026

- Supported an IBM client account, handling 25-35 tickets a week in ServiceNow. SLA compliance held at 98%.
- Worked directly with client users and their IT teams over calls and email to understand the issue, fix it and confirm it was resolved.
- Handled access, endpoint and software requests using Okta, Azure and Intune, and kept ticket records accurate so reports could be trusted.
- Went through recurring incidents and system performance data to find root causes. The fixes helped reduce downtime by 30%.
- Wrote 40+ knowledge base articles that cut repeat incidents by 20%.
- Supported 50+ software deployments with 95% delivered on time, coordinating across several teams.
- Prepared ticket and SLA reports in Excel and Power BI, and used SQL and Python (basics) to automate routine reporting.

PROJECT

Sales Performance Analysis Dashboard (personal project) | SQL, Excel, Power BI

- Queried and analyzed 50,000+ sales records in SQL, and cleaned the data in Excel with Pivot Tables, XLOOKUP and Power Query.
- Built an interactive Power BI dashboard covering revenue growth, product performance and regional sales.
- Found a 12% seasonal revenue rise in Q4 and recommended better inventory planning. Manual reporting effort fell by 30%.

EDUCATION

- Bachelor of Computer Applications (BCA), New Baldwins International Degree College, Bengaluru, 2024 (82%)
- Higher Secondary (HSC), Shastry Mahesh PU College, Bengaluru, 2021 (73%)
- Secondary School (SSC), Jubilee English High School, Bengaluru, 2019 (79%)

CERTIFICATIONS

- Google Data Analytics Professional Certificate (Coursera)
- Google Cyber Security Certification
- Power BI Crash Course
- Basic Python
